ARYA MOURYA

Greater Noida, India | +91 7542896736 | aryamourya0@gmail.com
github.com/AryaMourya | linkedin.com/in/arya-mourya-a6a126316

PROFESSIONAL SUMMARY

B.Tech Computer Science (AI/ML) student with hands-on experience in Java, Python and React. Built a thread-safe LRU cache, a neural network from scratch and a data-driven payments dashboard; selected for Smart India Hackathon 2026; open-source contributor to Home Assistant. Seeking a software development or AI/ML internship to build reliable, user-focused products.

EDUCATION

B.Tech, Computer Science & Engineering (AI/ML) **2025 – 2029**
Lloyd College of Engineering & Technology, Greater Noida | First-semester SGPA: 8.14

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML5, CSS3
Frameworks & Libraries: React, Tailwind CSS, Streamlit, NumPy, Pandas
Core Concepts: Data Structures & Algorithms, OOP, Java Collections, Generics, LRU Caching, Concurrency, Neural Networks
Tools: Git, GitHub, VS Code, Figma

EXPERIENCE

Web Developer Intern | InAmigos Foundation | Remote **Oct 2026 – Present**

- Researching and planning key features for an NGO website, including donation flows, volunteer registration, campaigns and impact showcases.
- Designing interface layouts in Figma and contributing to frontend implementation and improvements.

PROJECTS

ThreadSafe – Thread-Safe In-Memory Key-Value Store | Java GitHub

- Built a generic key-value cache supporting get, put, remove and containsKey, with configurable capacity and LRU eviction.
- Applied Java Collections, generics, OOP design and synchronization to support safe concurrent operations.

PayShield AI – Digital Payment Safety Dashboard | Python, Pandas, Streamlit GitHub

- Developed a hackathon prototype for expense categorization, budget monitoring, spending summaries and payment-safety education.
- Detected unusually large expenses using the interquartile range (IQR) method; added CSV import/export and Hindi/English guidance.

Neural Network from Scratch | Python, NumPy GitHub

- Implemented a modular neural network with activation functions, forward/backward propagation and gradient descent.

HACKATHONS & OPEN SOURCE

- **Smart India Hackathon 2026:** Selected with the project “AI-Powered Voice Cloning Detection & Prevention” (Problem ID SIH26104).
- **30-Hour Hackathon:** Team shortlisted among 75 of 900+ applicants; developed the CoolieBook railway porter-booking concept.
- **36-Hour Hackathon:** Contributed to RailSetu, a React-based railway crowd-monitoring and passenger guidance dashboard (simulated data).
- **Open Source (Home Assistant):** Submitted a documentation pull request improving Nest OAuth consent-screen setup instructions (PR #49115).
